

In the specification, page 1, after the title and before the first line, insert

B₂ ---This application is a continuation-in-part of Application Serial No. 09/335,572, filed June 18, 1999, now Patent No. 6,375,164.---

page 15, rewrite the three paragraphs on this page as follows:

---A pedestrian traffic control device which complies with the Americans with Disability Act is illustrated in Fig. 15. In this embodiment, two spaced-apart upright posts 120 and 121 are mounted on support bases 122. The posts are comparable to posts 20 and 21 described above, although they may be slightly shorter, say, thirty-six inches high. The posts are initially open at their upper ends, but in use are closed by caps 123 and 124 and do not accommodate cassettes similar to cassettes 23 and 24 within their upper ends.

B₃ A cassette (not shown), corresponding in all respects to cassette 53 described above, is carried within each post 120 and 121, each cassette being located below the top of its respective post.

At this point, each post is provided with a slot, and tape 132 is shown extending from the cassette in post 120 to post 121. A pull 133 carried by the free end of tape 132 is used to secure the free end of the tape to the bracket of a cassette (not shown)
